SUMMARY

Full-stack developer with 1+ year of production experience architecting serverless and microservice-based systems on AWS. Proficient in React.js, Redux, Node.js, and MySQL, grounded in OOP principles and active DSA problem-solving to sharpen logical thinking and write clean, efficient, maintainable code. Driven by curiosity — consistently exploring new tools, frameworks, and architectural patterns to stay ahead of the curve.

EDUCATION

PMIST

Bachelor of Computer Applications (BCA), CGPA: 8.25/10.0

Thanjavur, TN

Aug. 2022 – May 2025

Kalyana Sundaram Higher Secondary School

Higher Secondary Certificate (HSC), Percentage: 90.5%

Tamil Nadu

March 2020 – May 2022

EXPERIENCE

Full-Stack Developer

July 2025 – Present

Avivo AI

Thanjavur, TN

- Engineered full-stack product features using React.js, Redux, Node.js, and MySQL, optimizing state management for responsive production interfaces
- Architected scalable serverless microservices via AWS SAM (IaC) using Lambda, S3, EC2, and Cognito, delivering secure and cost-efficient cloud solutions
- Built high-performance RESTful APIs integrating Node.js with Redis caching for low-latency data synchronization across services
- Automated recurring business workflows using AWS CloudWatch scheduled cron events, reducing manual operational overhead
- Delivered features in Agile sprints, collaborating with QA, Product, and DevOps teams to ship modular, production-ready code

Full-Stack Developer Intern

April 2024 – June 2025

Tech Vaseegrah

Thanjavur, TN

- Engineered multi-tenant SaaS applications, translating business requirements into scalable full-stack architectures with seamless UX
- Integrated mission-critical third-party APIs—Razorpay OAuth for secure onboarding, ICICI Mandate API for automated subscription billing, and MSG91 for real-time SMS alerts
- Recognized with the 'Achiever Award' for technical excellence, rapid execution, and leadership in delivering software solutions

PROJECTS

Billzzy – Multi-Tenant Business Solution | *Next.js, TypeScript, AWS EC2, MySQL*

- Architected a multi-tenant SaaS platform with Next.js and TypeScript, deploying foundational infrastructure on AWS EC2
- Built automated recurring billing pipelines and secure onboarding flows; led integration meetings with ICICI and Razorpay vendor teams to unblock APIs and accelerate delivery
- Designed an event-driven notification system using the MSG91 SMS API for real-time order and client alerts

Cafe Food Ordering Platform | *MongoDB, Express.js, React, Node.js*

- Built a secure MERN stack application with JWT-based Role-Based Access Control (RBAC), isolating user and admin workflows
- Developed an interactive admin dashboard for sales analytics, real-time inventory tracking, and order management
- Integrated the Google Pay API for secure checkout with encrypted callback validation for transaction integrity

TECHNICAL SKILLS

Languages: JavaScript, Java, Python, SQL

Frontend: React.js, Redux, Next.js, HTML/CSS, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, WebSocket, Webhooks

Databases: MySQL, MongoDB, Redis

Cloud & DevOps: AWS (Lambda, EC2, S3, Cognito, CloudWatch, SAM/IaC), Docker, Git, GitHub

Tools: Postman, Ngrok, Cron, Chrome DevTools
