Summary

Full Stack Engineer and Node.js Backend Developer with 2+ years of production experience across a paid internship and a full-time role. Builds event-driven, concurrency-safe backends in Node.js and TypeScript (Express, NestJS) on PostgreSQL, MySQL, MongoDB and Redis, ships serverless services on AWS (Lambda, SAM) through CI/CD pipelines, and delivers React/Next.js frontends.

Experience

Avivo AI Technology Private Limited Jul 2025 – Present
Full-Stack Developer *Thanjavur, TN*

- Engineered full-stack product features using React.js, Node.js, and MySQL, optimizing state management for responsive production interfaces
- Architected scalable serverless microservices via AWS SAM (IaC) using Lambda, S3, EC2, and Cognito, delivering secure and cost-efficient cloud solutions
- Conducted multiple proof-of-concepts and technical research across product features to evaluate solutions, validate technical feasibility, and guide implementation decisions, while leveraging AI-assisted development through prompt and context design
- Delivered features in Agile sprints, collaborating with QA, Product, and DevOps teams to ship modular, production-ready code

Tech Vaseegrah Apr 2024 – Jun 2025
Full-Stack Developer Intern *Thanjavur, TN*

- Earned a paid internship in the second year of BCA by showcasing a self-built MERN food ordering app; received the Achiever Award for technical excellence and initiative
- Developed Billzzy (billzzy.com), a multi-tenant SaaS suite (POS, CRM, inventory) in Next.js, TypeScript and MySQL on AWS EC2, with ICICI mandate billing, Razorpay OAuth and MSG91 SMS alerts

Projects

Pickup Counter – Concurrency-Safe Kiosk | *TypeScript, NestJS, PostgreSQL, React, Socket.IO* GitHub

- Handled concurrent checkouts with PostgreSQL row locks taken in a fixed order, so stock can never oversell or deadlock; proved it with 83 Vitest concurrency/integration tests against real PostgreSQL
- Made payments exactly-once via HMAC-SHA256 webhook verification, an idempotency ledger (`ON CONFLICT DO NOTHING`) and a conditional `UPDATE` so each locker claim succeeds only once
- Tracked elapsed hold time with a server-computed countdown run on the client's monotonic clock, immune to wrong device clocks; live updates via Socket.IO with polling fallback

Legal Contract RAG Assistant | *Python, FastAPI, LangGraph, Pinecone, React, TypeScript* GitHub

- Implemented hybrid retrieval (dense embeddings + BM25 sparse vectors) on Pinecone with FlashRank re-ranking over structure-aware chunks that follow each contract's article, section and clause hierarchy
- Orchestrated a LangGraph pipeline – query expansion, per-document filtering, out-of-scope guard, conflict inspection and a citation validator that triggers bounded answer regeneration

Bank Statement Underwriting Engine | *Python, FastAPI, AWS Lambda, Azure Document AI, Gemini*

- Bank-agnostic statement parser that finds debit/credit/balance columns by balance-chain arithmetic (no per-bank templates), flags tampered statements, and derives FOIR, salary and EMI metrics on AWS Lambda

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, SQL
Backend: Node.js, Express.js, NestJS, FastAPI, REST, WebSockets, Webhooks, Event-driven, Microservices
Frontend: React.js, Next.js, Tailwind CSS, HTML/CSS **AI**: LangChain, LangGraph, RAG, Pinecone
Databases: PostgreSQL, MySQL, MongoDB (NoSQL), Redis, Prisma **Testing**: Vitest, Jest, Postman
Cloud & DevOps: AWS (Lambda, EC2, S3, Cognito, SAM/IaC), Docker, CI/CD (GitLab CI, GitHub Actions)
Practices: Git, code reviews, debugging (Chrome DevTools, AWS CloudWatch Logs), Agile/Scrum
Problem Solving: Data Structures & Algorithms in Java – 300+ practice problems

Education

Periyar Maniammai Institute of Science and Technology (PMIST) Aug 2022 – May 2025
Bachelor of Computer Applications (BCA), CGPA: 8.25/10.0 *Thanjavur, TN*

Kalyana Sundaram Higher Secondary School Mar 2020 – May 2022
Higher Secondary Certificate (HSC), Percentage: 90.5% *Tamil Nadu*
